NEW ACADEMIC SESSION -2021-22

“Before anything else, preparation is the key to success.” — Alexander Graham Bell

Dear Parent,

Yet another academic session full of unprecedented challenges has come to an end – and if we take a moment to reflect, the realization dawns upon us that day by day, inspiring experiences brought about a resolute transformation in all of us.

The humanitarian crisis inspired us to reboot and redesign the learning environments in tandem with changing time and gave us wings to map out realms unexplored. The students gained concrete experiences through diverse pedagogical practices which helped them stride ahead with fruition. We are determined to sustain working with a sanguine outlook and renewed verve at the outset of the **New Academic Session 2021-22**. We would have been happy to have students back in school ushering in the new academic session.

I take pride in acknowledging the colossal efforts put in by the entire school community in advancing the journey of education. All the stakeholders exemplified commitment and resolute determination with which they could steer across all the challenges amidst COVID epoch. We were successfully able to sail through it with technical support and your cooperation. The constant support received from you persistently kept us on the path of progress in the last academic session. We appreciate and look forward to your unremitting support in all our future endeavors.

During the year 2020, we embraced the challenges and provided the students the best possible opportunities for holistic experience. The students were engaged in

a rich mosaic of interclass, intraclass and interschool activities that were aimed at development of their intellectual, emotional, social, physical, artistic, creative and spiritual potentials. Furthermore, they excelled in diverse co-scholastic domains which lie at the heart of our core curriculum.

To calibrate towards the changing scenario, teachers were equipped with pertinent skills through workshops and training sessions. They wove numerous innovative teaching pedagogies into the learning process. All the teachers orchestrated learning environments that finally capitalized on learners' immense capacity to learn. The main objective was to prepare Fit for Future Ready (virtual) classrooms and also to prepare the young learners for uncertain future.

I also wish to bring to fore the fact that this is a time for our learners to indulge in physical activities fostering holistic growth. These will keep students engrossed and motivated towards physical fitness. Parental support is required to create a thirty minute time slot conducive for the physical activities. Students should practice yoga at home which would surely rejuvenate their entire persona and strengthen their might. Informative videos related to Yoga and Physical activities will be provided by the school.

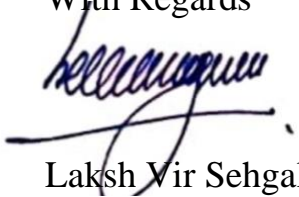

We strongly believe that education settings should continue to be all-encompassing and supportive environments to all involved. Accordingly, enriching online sessions for classes I-VIII will be resumed w.e.f 5 April 2021. Guiding principles related to offline classes for I-VIII are awaited from the Government.

Offline classes with hybrid teaching learning model (combining cutting-edge online learning with an in-person experience) will be resumed for the senior students of classes IX, X and XII w.e.f 5 April 2021.

We look forward to another rewarding year full of positive and engaging learning experiences for the students. Let us together nurture the lasting passion for learning and uphold the legacy of excellence!

Wishing you all a very Happy New Academic Year!

With Regards
