**Implementation of Intensified Diarrhoea Control Fortnight from 05<sup>th</sup> - 17<sup>th</sup> June 2023**

With reference to the DoE circular number No. DE.23 (386)/Sch.Br./SHP/2023/146-15/ dated 05/06/2023, regarding spreading awareness of Childhood diarrhoeal disease which continues to be a major killer among children, Delhi is implementing Intensified Diarrhoea Control Fortnight (IDCF) from 5<sup>th</sup> -17<sup>th</sup> June 2023.

Diarrhoea can be prevented by use of safe drinking water, hand-washing, sanitation and immunization. Almost all the deaths due to diarrhoea can be averted by preventing and treating dehydration by the use of ORS (Oral Rehydration Solution) and administration of Zinc tablets along with adequate nutritional intake by the child during diarrhoea.

**Preventions**

Hand washing is an important process for removing or reducing the number of micro-organisms from the hands. Washing of one's hands will decrease the risk of infectious diseases like Diarrhoea.

**Let's all resolve to prevent Diarrhoea by maintaining proper hygiene and lead a healthy life!**

Regards
